emilydiamond321@gmail.com

Web developer specialising in WordPress, with a focus on turning thoughtful designs into flexible, user-friendly websites.

Relevant Experience

Web Developer
Platform 81 · Dec 2024 - 2025

- Develop custom WordPress sites from Figma designs using flexible block-based layouts and ACF fields.
- Ensure high standards of code quality, responsiveness, and cross-browser compatibility across all projects.
- Update and maintain plugins, ensuring site security, performance, and optimisation.
- Manage allocated websites, implementing functional and content updates as required.
- Handle client requests via the ticket system, communicating changes and delivering solutions.
- Collaborate with designers and internal teams to accurately translate designs into live sites.

Web Designer/ Developer
Colour in media · Apr 2023 - Dec 2024

- Engage with clients to understand their website goals and requirements, ensuring the final product aligns with the vision and business objectives before starting the development process.
- Design and develop custom WordPress websites using Adobe XD for prototyping and Wordpress with Elementor for implementation.
- Translate client requirements into user-friendly, responsive, and visually appealing websites.
- Optimise websites for performance, SEO, and mobile responsiveness.
- Set up hosting environments, and manage the launch of websites.
- Regularly update and maintain websites, ensuring functionality, security, and user experience standards are met.
